

Ohio

An EMCOR Company

Unparalleled electrical solutions in nearly every major market

For over 25 years, Dynalectric Ohio has been one of the region's leading providers of high-performance electrical systems, innovative technology applications, and expert facility services.

MAIN CAPABILITIES

Quality Craftsmanship. Innovative Electric & Technology Solutions.

Dynalelectric Ohio offers advanced electrical construction, installation, maintenance, and facilities services. Combining quality craftsmanship with cutting-edge technology, we've worked with dozens of Ohio's most prominent organizations, installing and maintaining their vital electrical systems.

We offer complete design-build/design-assist services for an array of telecom, data, and low-voltage networks. Our preventive maintenance programs and 24/7 service teams help ensure reliable, efficient system operation. No matter the electrical challenge, we're ready with industry leading solutions.

Working Safely is the Only Option

At Dynalelectric Ohio, productivity isn't about shortcuts—it's about safely creating the right conditions for schedules and plans to be completed on time or with time advantage. This includes pre-planning, setup, deploying trained workers with the right tools and equipment, as well as the correct degree of instruction and supervision. The integration of safety, quality, and productivity has successfully helped to reduce injuries and injury costs. Because doing things safely isn't just a goal at Dynalelectric Ohio. It's a core value.

Tailored Designs. For Custom Projects.

Our design capabilities help ensure that electrical installations are tailored to client's requirements. During a project's initial stages, we seek to identify and resolve any constructability, building code, and other issues before they become problems. Then, as each project progresses, our team monitors construction quality, costs, and schedules, working to reduce risks wherever possible. The result is faster facility startup and project completion.

Total Project Management. Total Coordination.

At Dynalelectric Ohio, we utilize a total project coordination methodology that includes a full range of sophisticated planning, scheduling, and tracking tools. This management approach helps ensure timely communications, effective quality control, and rigorous cost management.

Dynalectric

Ohio

An EMCOR Company

Design-Build

As a full-service electrical solutions provider, Dynalectric Ohio offers complete in-house engineering and design-build capabilities. We combine our seasoned engineers with sophisticated CAD technology and professional construction-management services. Our project managers help control costs and schedules, reduce administrative burdens, and improve risk management. In short, Dynalectric Ohio is a one-stop-shop for electrical design-build projects of virtually any size or complexity.

Telecom and Data

Dynalectric Ohio has over three decades of telephone and data project experience. With Building Industry Consulting Service International (BICSI) and Registered Communications Distributions Designer (RCDD) personnel on staff (many of whom are trained and certified as Value Added Resellers for AMP-NetConnect), you can trust our expertise. We are well equipped to meet customer needs for network installation, changes, or emergencies—24/7/365. Further, we offer aftermarket service and maintenance contracts on all electrical and data/telecom work.

Infrared Imaging

Using the latest in equipment and software, our technicians can identify minute temperature differences between a suspected problem item (such as a wire, cable connection, fuse clip, motor bearings, and more) and a known item of a normal temperature. After a full analysis, we are able to deliver a comprehensive infrared imagery report which includes: infrared image-related color photos with arrows pointing to trouble spots, camera settings, and probable causes. These images are key for us developing effective corrective actions, in line with client needs, long before serious issues evolve.

Low Voltage Systems

Sound

Dynalectric Ohio offers an array of integrated sound and communications solutions—from digital telephone, voice messaging, intercom and emergency-call systems to nurse-call, wandering-patient, and master-clock systems.

Controls

Our controls solutions help optimize building and plant systems so they work seamlessly and reliably. Our technicians can integrate a variety of communication solutions with existing systems as well as with today's digital networking platforms. We work closely with clients to customize a solution aimed at maximizing return on investment.

Security

Dynalectric Ohio's security capabilities address a full range of customer needs and applications, from entry-level, single-workstation access-control systems to high-performance, networked security-management systems. Whether clients are looking to protect a small single-story building, or connect multiple sites with a fully integrated security management system, we've got the solution.

Fire Alarms

We offer the latest in fire alarm and fire detection systems and technology. Our capabilities include both new construction projects and retrofits, offering advanced systems for every application. We have the capacity to handle small, single-story buildings, high-rise office complexes, and even networked multi-building campuses. Our team also has the expertise needed to help ensure compliance with today's stringent codes, standards, and design practices.

Facilities Services

Whether working on small data problems or large outages, our service team strives for complete customer satisfaction. From high-voltage generators to low-voltage networks, LED lighting, and data circuits, clients can depend on our expertise to help their facilities achieve optimal performance. Our highly qualified, highly skilled technicians receive continuous training and education to keep them at the cutting edge of the industry.

A Fortune 500® company and a member of the S&P 500, EMCOR Group, Inc. (NYSE: EME) is a leader in mechanical and electrical construction, industrial and energy infrastructure, and building services.

At work in virtually every sector of the economy, EMCOR companies build, power, service, and protect the dynamic systems that create facility environments—from electrical and lighting infrastructure to mechanical and HVAC equipment to security, fire protection, and much more.

Combining the strength of an industry leader with the knowledge and care of over 400 locations, the 46,000+ skilled employees of EMCOR have completed some of the country's most ambitious projects.

Safety that Beats the National Average

EMCOR's safety performance consistently remains strong year after year with a current Incident Rate that is more than 50-percent lower than our competitors (Source: Bureau of Labor Statistics Industry Average for Specialty Contractors NAICS 2382, 2023). For 15+ consecutive years, our incident rate has been less than half the industry average.
